### Technical Parameters

|                    |                               |
|--------------------|-------------------------------|
| Diameter           | 1/2 Inch                      |
| Class              | Gr.8                          |
| Driving features   | Hexagon                       |
| Material           | Steel                         |
| Material technical | SAE J995                      |
| Thread direction   | Right                         |
| Surface treatment  | Zinc plated yellow passivated |
| Thread             | Unified National Coarse       |

### Standards

|      |         |
|------|---------|
| BS   | ≈1768   |
| ASME | B18.2.2 |

### Technical Specification

|     |        |
|-----|--------|
| F   | 0.75   |
| H   | 0.4375 |
| TPI | 13     |
